DONATR

search bar functionality clarity on home page

DONATR connects donors like you to volunteers who pick up your donations and deliver them to local organizations.
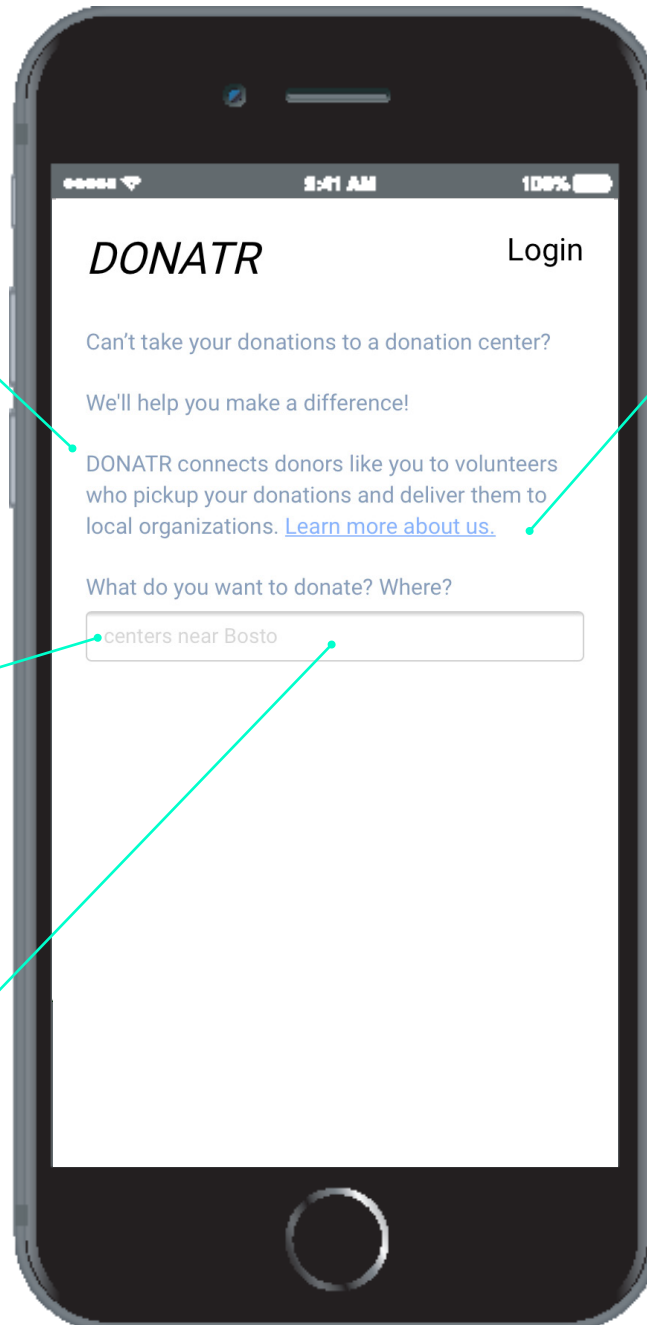

simple summary
a concise but informative explanation captures users' attention and entices them to read and understand DONATR's purpose

multiple examples
live, rotating ghost text of multiple example searches prompts users, in a friendly way, to search anything

minimal interactions
a single omni-search bar lets users think about what is important to them, with no limitations

Can't take your donations to a donation center?

We'll help you make a difference!

DONATR connects donors like you to volunteers who pickup your donations and deliver them to local organizations. Learn more about us.

What do you want to donate? Where?

centers near Bosto

more information
some users might want to learn more about DONATR, so the option is there for those who want it, but is not overwhelming to those who don't care

many input possibilities?
separate name, location, charity, etc. inputs would have provided structure and removed confusion around what the search bar supports. yet, such a format would limit and constrict users' searches
